

GEN 3 SERVICES

GEN 3.1 AERONAUTICAL INFORMATION SERVICES

3.1.1 Responsible service

The Aeronautical Information Service (AIS) Department is under the Office of the Deputy Director General for Operations of the CAA of the Philippines (CAAP) which ensures the flow of aeronautical data and aeronautical information necessary for the safety, regularity and efficiency of international and national air navigation within the area of its responsibility as indicated in GEN 3.1, item 3.1.2.

It consists of services as listed below:

1. AIS Department

AIS Department
Ground Floor Philippine Air Traffic Management Center
CAAP Compound, MIA Road
1300 Pasay City, Metro Manila
Philippines
Phone: (+63)(02) 8246-2179, 8672-7746
Email: ais_operations@caap.gov.ph
AFS: RPLLYOYX
Website: ais.caap.gov.ph
HR of OPS: MON - FRI: 0000 - 0900 (excluding holidays)

a. International NOTAM Office (NOF)

NOTAM Management Section
Ground Floor Philippine Air Traffic Management Center
CAAP Compound, MIA Road
1300 Pasay City, Metro Manila
Philippines
Phone: (+63)(02) 8672-7785, 8672-7757 (Telefax)
Email: ais_operations@caap.gov.ph
ais_notammanagement@caap.gov.ph
AFS: RPLLYNYX
HR of OPS: H24

b. AIP Management/Charting Management/Data Management Offices

AIP Management/Charting Management/Data Management Sections
Ground Floor Philippine Air Traffic Management Center
CAAP Compound, MIA Road
1300 Pasay City, Metro Manila
Philippines
Phone: (+63)(02) 8672-7785, 8672-7757 (Telefax)
Email: ais_aipmanagement@caap.gov.ph
ais_chartingmanagement@caap.gov.ph
ais_datamanagement@caap.gov.ph
HR of OPS: 2300 - 1500

3.1.2 Area of responsibility

The AIS Department is responsible for the provision of aeronautical data and aeronautical information for the entire territory of the Republic of the Philippines and for the airspace over the high seas encompassed by the Manila Flight Information Region.

3.1.3 Aeronautical publications

The aeronautical information shall be provided in the form of aeronautical information products and services.

Aeronautical information product consists of aeronautical data and aeronautical information provided as a standardized presentation in paper or electronic media. Aeronautical information products include:

- Aeronautical Information Publication (AIP), including Amendments and Supplements;
- Aeronautical Information Circulars (AIC);
- Aeronautical Charts; and
- Notice to Airmen (NOTAM).

NOTAM including the checklist of valid NOTAM are distributed via Aeronautical Message Handling System (AMHS)/Aeronautical Fixed Telecommunication Network (AFTN). All other aeronautical information products are distributed through the new AIS website (ais.caap.gov.ph).

1. AIP and related amendment service

The AIP is the basic aeronautical information document published for the Republic of the Philippines and contains information of a lasting character essential to air navigation. It is only available in English and is maintained up to date by an amendment service of reprinted pages.

Amendments to the AIP together with checklists are made by means of replacement sheets.

AIRAC AIP Amendment (AIRAC AIP AMDT) is produced and issued in accordance with the AIRAC System and identified by the acronym - AIRAC, incorporates operationally significant permanent changes into the AIP on the indicated effective dates.

A brief description of the subjects affected by the amendment is given on the AIP Amendment cover sheet. New information included on the reprinted AIP pages is annotated or identified by a thick vertical line in the side closer to page edge of the change/addition.

Each AIP page and its replacement page introduced by an amendment, including the amendment cover sheet, are dated. The date consists of the day, month (by name) and year of the effective date of the information. Each AIRAC AIP amendment cover sheet includes references to the serial number of those elements, if any, of the aeronautical information products which had been incorporated in the AIP by the amendment and are consequently cancelled.

Each AIRAC AIP amendment is allocated with a serial number, which shall be consecutive and based on the calendar year. The year, indicated by two digits, is a part of the serial number of the amendment, e.g. AIRAC AIP AMDT 001/25.

A checklist of AIP pages containing the page number and the effective date [day, month (by name) and year] of the information is reissued with each amendment and is an integral part of the AIP.

2. AIP Supplements

AIP Supplements are temporary changes of long duration (three months and longer) and information of short duration which consist of extensive text and/or graphics, supplementing the permanent information contained in the AIP, are published as AIRAC AIP Supplements (AIRAC AIP SUP). Operationally significant temporary changes to the AIP are published in accordance with the

AIRAC system and its established effective dates; and, are identified clearly by the acronym AIRAC AIP SUP.

AIP Supplements are placed at the beginning of the AIP. Each AIP Supplement shall be provided on distinctive pages allowing for easy identification from the regular AIP content. Each AIP Supplement (AIRAC) is allocated with a serial number, which is consecutive and based on the calendar year, i.e. AIRAC AIP SUP 001/24.

An AIP Supplement is kept in the AIP as long as all or some of its contents remain valid. The period of validity of the information contained in the AIP Supplement will normally be given in the supplement itself. Alternatively, NOTAM may be used to indicate changes to the period of validity or cancellation of the supplement.

A checklist of AIP Supplements currently in force is published through an AIP Supplement at the start of the year and shall be issued at intervals of not more than one month as part of the checklist of NOTAM.

3. AIC

AIC contain information on the long-term forecast of any major change in legislation, regulations, procedures or facilities; information of a purely explanatory or advisory nature liable to affect flight safety; and information or notification of an explanatory or advisory nature concerning technical, legislative or purely administrative matters.

Each AIC shall be allocated a serial number which shall be consecutive and based on the calendar year. The year, indicated by two digits, is a part of the serial number of the AIC; e.g. AIC 001/24. A checklist of AIC currently in force is published through an AIC at the start of the year and shall be seen as part of the checklist of NOTAM issued monthly.

4. NOTAM

A NOTAM is a notice distributed by means of telecommunication containing information concerning the establishment, condition or change in any aeronautical facility, service, procedure or hazard, the timely knowledge of which is essential to personnel concerned with flight operations. The text of each NOTAM contains the information in the order shown in the ICAO NOTAM Format and is composed of the significant/uniform abbreviated phraseology assigned to the ICAO NOTAM Code complemented by ICAO standard abbreviations, indicators, identifiers, designators, call signs, frequencies, figures and plain language. NOTAM are originated and issued for Manila FIR and are distributed in two series identified by the letters B and C.

Series B - Information of concern to adjacent NOF.

Series C - Information of concern to national or domestic aerodromes only.

NOTAM is published as and when necessary to disseminate information of direct operational significance which;

- a. is of an ephemeral nature;
- b. requires advance distribution; or
- c. is appropriate to the AIP but needs immediate dissemination.

Each NOTAM is assigned with a four-digit serial number preceded by an appropriate letter indicating the series and followed by a stroke and two digits indicating the year of issuance. The serial numbers start with 0001 at 0000 UTC on January every year. A checklist of NOTAM currently in force is distributed daily via AMHS/AFTN.

NOTAM are published by Manila NOF. NOTAM are transmitted through European AIS Database (EAD) in accordance with a predetermined distribution system. Requests concerning the distribution of NOTAM shall be addressed to RPLLYNYX.

5. Aeronautical Charts

An aeronautical chart is a representation of a portion of the Earth, its culture and relief, specifically designated to meet the requirements of air navigation. The aeronautical charts included in the AIP are kept up to date by amendments to the AIP. Corrections to aeronautical charts not contained in the AIP are promulgated by AIP Amendments or AIP Supplements.

6. Sale of Publication

The aeronautical information products may be purchased from the AIS Department. The AIP manual costs PHP3400.00 for local subscribers and US\$130.00 for international subscribers, and additional charges of US\$20.00 for postal and US\$40.00 for bank charges. The Amendment Service Subscription for one calendar year is PHP1600.00 for local subscribers and US\$100 for international subscribers, and additional charges of US\$20.00 for postal and US\$40.00 for bank charges. AIP cover or binder may be purchased for US\$30.00.

An additional twelve percent (12%) value added tax (VAT) shall be imposed on purchased aeronautical information products including postal and bank charges.

3.1.4. AIRAC system

In order to control and regulate the operationally significant changes requiring amendments to charts, route-manuals, etc., such changes, whenever possible will be issued on predetermined dates according to the AIRAC system. This type of information will be published as an AIRAC AIP SUP. If an AIRAC AIP SUP cannot be produced due to lack of time, NOTAM will be issued. Such NOTAM will immediately be followed by an AIRAC AIP SUP.

The table below indicates AIRAC effective dates for the coming years. AIRAC information will be issued so that the information will be received by the user not later than 28 days, and for major changes not later than 56 days, before the effective date.

AIRAC AIP AMDT and AIRAC AIP SUP shall always be triggered by a NOTAM and shall be issued as soon as possible, preferably at the publication date of the said AIRAC AIP AMDT or the AIRAC AIP SUP. Trigger NOTAM must always start with the words 'TRIGGER NOTAM' (followed only in the case of an AIP Amendment by the abbreviation 'PERM'), the reference number of the published AIP Amendment or AIP Supplement concerned, the effective date and a brief description of its contents.

A Trigger NOTAM must come into force on the effective date and time of Amendment or Supplement they refer and shall remain in force for 14 days.

If there is no AIRAC AIP AMDT to be published at the established interval or publication date, a NIL notification shall be distributed by NOTAM checklist. The distribution of a NIL notification shall be done at least 28 days in advance of the AIRAC date concerned.

Schedule of AIRAC Effective Dates				
2024	2025	2026	2027	2028
25 Jan	23 Jan	22 Jan	21 Jan	20 Jan
22 Feb	20 Feb	19 Feb	18 Feb	17 Feb
21 Mar	20 Mar	19 Mar	18 Mar	16 Mar
18 Apr	17 Apr	16 Apr	15 Apr	13 Apr
16 May	15 May	14 May	13 May	11 May
13 Jun	12 Jun	11 Jun	10 Jun	08 Jun
11 Jul	10 Jul	09 Jul	08 Jul	06 Jul

31 Oct	30 Oct	29 Oct	28 Oct	26 Oct
28 Nov	27 Nov	26 Nov	25 Nov	23 Nov
26 Dec	25 Dec	24 Dec	23 Dec	21 Dec

3.1.5. Pre-flight information service at aerodromes/heliports

Pre-flight information service is available at the Flight Service Station (FSS) or Control Tower at aerodromes where air traffic services are provided (refer to AD pages for the details).

NOTAM are available at the NOTAM Management Section and can also be downloaded, printed or viewed on the AIS website.

3.1.6. Digital data sets - Nil
