

AD 1 AERODROMES/HELIPORTS - INTRODUCTION

AD 1.1 AERODROME/HELIPORT AVAILABILITY AND CONDITIONS OF USE

1.1.1 General conditions

1. This section contains information on all aerodromes, which are available for use in international and national aircraft operations. AD 2 detailed the physical characteristics of international and national aerodromes. Such aerodromes/heliports are grouped as stated in AD 1.4. Section AD 2 - AD 3 details the physical characteristics of aerodromes and heliports. AD 2 covers aerodromes and AD 3 covers heliports.
2. Landing and take-off of civil aircraft are not permitted in all aerodromes whether listed in the AIP or not, except in cases of emergency or where permission has been granted by the owner or authorized representative.
3. The administration of all aerodromes shall be the responsibility of the Airport Managers/ Officers-in-Charge appointed/or designated by the CAA of the Philippines (CAAP) except those owned/operated by other government authorities (as mandated by law) or private entities.
4. CAAP shall issue appropriate certificate or authorization (Aerodrome Certificate, Registration Type 1, Registration Type 2 and/or Permit to Operate) to all aerodromes and heliports, to ensure compliance with applicable standards.
5. Aerodromes listed in this AIP are available for use as published, subject to compliance with CAAP regulations and relevant aerodrome procedures.
6. Availability of services (ATS, RFFS, MET, etc.) must be confirmed in advance if operating outside normal hours.
7. All civilian helicopters are restricted from passing within 1 NM from the periphery of an installation solely for military use.
8. Unless authorized by the appropriate ATS authority, VFR flight shall not be operated between sunset and sunrise as prescribed by the Director General of Civil Aviation.
9. All general aviation aircraft with gross weight of 5675 KG (12500 LBS) or less shall not take-off or land in any aerodrome when severe weather conditions exist such as heavy showers, thunderstorm, turbulence and gust.
10. All IFR rated aircraft with a certificated take-off gross weight of 3182 KG (7000 LBS) and above on passenger flight, regardless of flight plan filed, shall be operated only with a duly rated co-pilot.
11. Operational status of private aerodromes and heliport not listed in the AIP, is not announced by NOTAM.
12. Subject to their published conditions of use, aerodromes and their facilities shall be kept continuously available for flight operations during their published hours of operations, irrespective of weather conditions.
13. The Standards and Recommended Practices of ICAO Annex 14 are applied with exceptions (see differences from ICAO on GEN 1.7).

1.1.2 Use of military air bases

1. Civilian use of military air bases is not allowed without prior coordination and approval from the Armed Forces of the Philippines (AFP).
2. Requests must be submitted to CAAP and AFP with complete flight details at least 72 hours prior to the operation.
3. Emergency landings are permitted with immediate notification to concerned authorities.

1.1.3 Low visibility procedures

Nil.

1.1.4 Aerodrome operating minima

1. Aircraft operators must use their own approved minima, in accordance with CAAP regulations and aircraft performance.

1.1.5 Other information

1. Noise Abatement: Comply with local procedures where applicable.
2. Wildlife Hazards: Be alert for bird or animal activity. Report sightings to ATC.
3. Runway Conditions: During adverse weather, runway surface conditions are published via SNOWTAM, as applicable.
4. Fuel and Customs: Check AD 2 for availability of fuel types, customs and immigration services.
